How Power Smart Are We?

Energy Investigations – Computers

- Photocopy worksheets.
- Students go around the school and investigate how computers at school use energy.
- Record on the sheet the number of computers and monitors that are **ON or OFF** when no one is using them.

Room – classroom, library, office, staff room or other (explain)	Number of computers	Computers & monitors are ON	Computers & monitors are OFF
Total number of computers:			

At the end of the investigation:

- Add the total number of computers
- Add the number of **ON** scores
- Subtract the number of **ON** scores from the **TOTAL** number of COMPUTERS
- How many computers are **OFF** when on one is using them?

How Power Smart are we?

How can we encourage our school to turn off computers when no one is using them?
